EDUCATION

Birla Institute of Technology, Mesra

Integrated Master of Science - Mathematics and Computing - CGPA - 9.05

2024 – 2029

Ranchi, Jharkhand

ACHIEVEMENTS

- Secured 2nd position in IEEE-Megaproject 2026 **Link** – January, 2026
- Secured Rank 1228 in the ICPC (Kanpur Region) (Team- BIT TEAM 8) **Link** – November, 2025
- Secured Rank 2981 in the Prelims Round among 13,000+ participants – IICPC CodeFest 2026 **Link** – February, 2026
- NXP AIM Regional Finalist **Link** – August, 2025
- Qualified Smart India Hackathon (SIH) Internal College Round **Link** – September, 2024
- Secured 1st place in the Capture the Flag (CTF) – CICADA Pantheon BIT,Mesra **Link** – September, 2025

PROJECTS

DropNest – E-Commerce Price Tracker | PostgreSQL, React.js, Express.js, Puppeteer **GitHub** | **Live**

- Developed a full-stack e-commerce price tracking platform for Amazon and Flipkart with automated price monitoring, historical price visualization, and target price alerts.
- Implemented Supabase Authentication and PostgreSQL with Prisma ORM to design a normalized database schema for secure user, product, and price history management.
- Built a Puppeteer-based web scraping engine with automated CRON jobs running every 6 hours to fetch live product prices and maintain historical price records.
- Optimized product tracking by preventing duplicate product records through a normalized database design, enabling multiple users to track the same product efficiently.
- Designed and deployed a responsive React application using Tailwind CSS, Shadcn UI, and Zustand on Vercel and Render.

CoinPulse – Crypto Dashboard | React.js, Firebase, Recharts, CoinGecko API **GitHub** | **Live**

- Developed a real-time cryptocurrency dashboard tracking the top 100 cryptocurrencies with historical price charts, watchlist management, and multi-currency support.
- Implemented Firebase Authentication and Cloud Firestore for secure user authentication and real-time synchronization of user wishlists.
- Integrated the CoinGecko API and optimized market data fetching through centralized caching, reducing redundant API requests across the application.
- Designed and deployed a responsive React application using Tailwind CSS, Shadcn UI, and Recharts with reusable UI components and interactive data visualizations.

COMPETITIVE PROGRAMMING

Codeforces: Pupil (1398)

LeetCode: (1615)

CodeChef: 3-Star (1603)

TECHNICAL SKILLS

- **Languages:** C++, Java, JavaScript, Python, C, SQL
- **Frontend:** React.js, HTML, CSS, Tailwind CSS, Shadcn UI, Material UI, Recharts
- **Backend:** Node.js, Express.js, REST APIs, Prisma
- **Databases:** PostgreSQL, MongoDB, Firebase Firestore, Supabase
- **Developer Tools:** Git, GitHub, Vercel, Render, Netlify
- **Libraries & Technologies:** Puppeteer, Zustand, Redux Toolkit, Firebase Auth, Supabase Auth

LEADERSHIP & VOLUNTEERING

- Conducted a C++ programming workshop for 300+ students, teaching programming fundamentals and problem-solving techniques.
- Organized the club recruitment process, including question preparation, logistics, and candidate evaluation.
- Volunteered with the National Service Scheme (NSS), conducting village education drives and organizing blood donation camps.
